

Help Make Expo a Low Waste Celebration

Food, games, prizes, and fanfare are all part of a fun community celebration. Unfortunately, so is waste. No one wants to see our City, River and Parks littered with celebration refuse.

In honor of Expo '74, the first ever Environmentally Themed World's Fair, Spokane Zero Waste (SZW) has developed a program to reduce waste both upstream and downstream.

To implement this program **we need volunteers to serve as Waste Ambassadors during Opening Ceremonies, Bloomsday and other iconic Spokane events.** Waste Ambassadors will receive training and help vendors and celebrants properly dispose of waste in 3 categories: recycling, compost and landfill.

- Waste Ambassadors will work in groups of 2-3 alongside a staffed information booth
- Shifts will range from 3-5 hours
- We encourage businesses, organizations, clubs, and families to fill a shift as a day of community service.

Help us reach our goal of sending more material to recycling and compost than to landfill and set a new bar of sustainability in Spokane.

Learn more about this volunteer opportunity and be part of a new, low-waste chapter of Spokane history.
